

ABSTRACT OF THE DISCLOSURE

An all-terrain vehicle ("ATV") includes a frame and at least three wheels suspended from the frame. At least one of the wheels is a front wheel and at least one of the wheels is a rear wheel. The front wheel defines a front axis and the rear wheel defines a rear axis. The front axis and the rear axis define a wheelbase of between 52 and 72 inches. A power unit drives at least one of the wheels. The ATV includes a straddle-type seat with a main seat portion for a driver and a secondary seat portion, rearward of the main portion, for a passenger. The ATV also has right and left footrests that each include a front footrest for the driver and a rear footrest for the passenger. A steering member steers at least one of the wheels.
